

PROJECT COST ESTIMATOR (PCE®)

STANDARDIZE ALL DATA, SAVE TIME & RESOURCES, AND PREVENT DELAYS.

Can you estimate your project costs, "Accurately"?

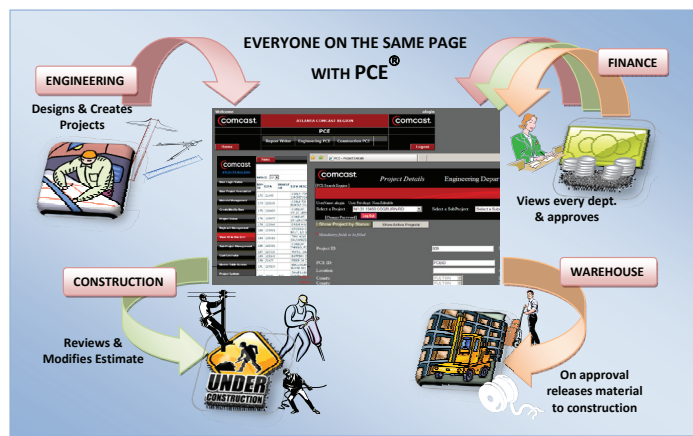

IMMCO's Project Cost Estimator (PCE) is your answer to the question.

IMMCO's PCE 2.0 is a web-based application for estimating and managing labor and material costs for cable TV construction projects. PCE integrates resources from engineering, construction, warehouse, and finance into a single project outline.

PCE FEATURES

- PCE is web accessible 24/7
- Precise costing of projects
- Completely customizable inventory information with internal part numbers, vendor numbers, item descriptions, pricing and discounts
- Painless sub projects management
- Fully adaptable labor, aerial/underground/MDU, HSD, telephony calculators
- Creates a single repository for valuable project data
- Integrates engineering, construction, finance and materials departments with a single project data source
- Email enabled communication
- Customizable forecast plug-in
- Supervise projects using PCE search Engine
- Accurate warehouse logistics management

EFFECTIVE PROJECT ESTIMATION IS ONE OF THE MOST CHALLENGING AND CRITICAL TASKS IN ANY MSO NEW BUILD / UPGRADE PROJECT. PCE ENABLES QUICK AND EASY ACCESS TO EFFICIENT PROJECT ESTIMATION, MATERIAL TRACKING, FORECASTING, AND EXECUTION.

EVERYONE ON THE SAME PAGE

- Engineering
- Construction
- Warehouse
- Finance

TECHNICAL FACTS

- Supports open databases
- Role based security access control that is built into a workflow system between engineering, construction, finance, and warehouse
- Eliminates legacy data errors

REPORTS

- Project cost estimate reports
- Flexible user defined reports
- Reports that can be exported to Microsoft Excel
- Customizable labor section
